SUMMARY

Backend-focused Django developer with hands-on experience building full-stack web applications using Django and PostgreSQL. Built production-style projects featuring payment integration, role-based dashboards, booking systems, notifications, admin customization, and deployment workflows. Interested in open-source collaboration, scalable backend systems, and collaborative engineering environments like the MLH Fellowship.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & Tools: Django, Django REST Framework, Bootstrap, Git, GitHub, PostgreSQL, SQLite, PythonAnywhere

Concepts: REST APIs, Authentication, CRUD Operations, Deployment, Role-Based Access Control

PROJECTS

Car Rental Platform

Django, PostgreSQL, Bootstrap

- Built a full-stack rental platform with separate dashboards for customers and vehicle owners
- Implemented booking workflows, payment integration, review & rating system, and notifications
- Added custom Django admin features and vehicle approval workflows
- Focused on backend architecture, database relationships, and scalable feature implementation

GitHub: <https://github.com/sudhanchaudhary/Car-rental-platform>

Restaurant & Bakery Management Website

Django, Bootstrap

- Developed and deployed a responsive restaurant and bakery website
- Built dynamic menu management and admin-controlled content workflows
- Deployed application using PythonAnywhere

EXPERIENCE

Independent Django Developer | 2025 – Present

- Built and deployed multiple Django-based applications independently

- Worked with authentication systems, database modeling, deployment, and backend logic
- Used Git and GitHub for version control and project collaboration practices

EDUCATION

Tribhuvan University | Bachelor's in Computer Application

ACHIEVEMENTS

- Built production-style web applications with payment and notification systems
- Continuously improving backend engineering and open-source development skills
